Hi my name is Arne, I am a freelance developer based in Belgium, with a main focus on Java backend development.

Besides Java I try to work on personal development and learning new things. Currently, I am discovering the cloud world and everything that is part of it. Also clean code and software design is something I want to focus on.

If you catch me outside of work:

I like to travel, I love cycling and coffee keeps me going!

Work experience

2022 - now: Developer IDM Flemish Government

2020 - 2022: Java Developer Conundra

2018 - 2020: Java Developer Belga

2018 - 2022: Java Consultant Axxes

2018: Intern Intracto Digital Agency

2016 - 2018: Student job garden maintenance

2014 - 2015: Student job Astra Sweets

2015: Intern computer store CenCmedia

2014: Intern daycare center Poppedijntje

Education

higher education: 2015 - 2018 Bachelor - Applied Computer Science (Application development)
Thomas More - Geel

2017 autumn: Erasmus - Applied Computer Science
Western Norway University of Applied Sciences - Bergen, Norway

secondary education: 2012 - 2015: Computer management
Sint-Victor - Turnhout

2009 - 2012: Science
Sint-Pieter - Turnhout

Skills

technologies, tools, frameworks and other things I have worked with

Programming languages: Java - Python - JavaScript - VisualBasic - Kotlin - HTML - CSS - Go - PHP

Frameworks: Spring - React - Next JS - Gatsby JS - Tailwind CSS

Cloud: AWS - Vercel

Databases: Mongo - DocumentDB - SQL - Elasticsearch - Active MQ - Solr

Operating Systems: Linux - MacOS - Android - Unix - Windows

Tools: Terraform - Docker - Git - Jenkins - JIRA - Gradle - Maven - LocalStack - npm

Other: SCRUM - Clean Code - Software craftsmanship - Adobe CC

My timeline as a software developer

April 2022

Flemish Government

At the Flemish Government, the [IDM team](#) focuses on identity management and provisioning entitlements. We also integrate with SCIM, SOAP, and LDAP target systems. In the first year, we successfully completed a significant migration to AWS.

[Java](#), [Spring](#), [DocumentDB](#), [AWS](#), [Oracle SQL](#), [Jenkins](#), [Docker](#), [SQS/SNS](#), [Maven](#), [GIT](#) and more

April 2022

Start of my freelance adventure

In 2022, I embarked on a freelance career, leaving Axxes behind. Arneckx was born, and I decided to create a website to document this exciting journey. It became my second JamStack website, and you can find the result [here](#).

[Next JS](#), [Tailwind CSS](#), [Vercel](#), [JavaScript](#), [npm](#)

October 2021

How to run AWS on your local machine

During my time at Axxes, knowledge sharing was highly valued. In 2021, I had the opportunity to give my first-ever talk at the Haxx conference, which took place in Mallorca. The talk focused on LocalStack, a valuable tool for testing AWS services locally. You can watch the talk [here](#), and the source code is available on [GitLab](#).

[LocalStack](#), [Terraform](#), [Python](#), [AWS](#), [JavaScript](#), [GitLab](#)

March 2020

Conundra

Conundra is a company dedicated to transport optimization, aiming to save costs and create more efficient routes. With several transport companies and HelloFresh as their customer, I worked on the [backend platforms](#) that enable customers to seamlessly view, plan, and adapt their routes.

[Java](#), [Spring](#), [Mongo](#), [AWS](#), [PostgreSQL](#), [CircleCI](#), [Docker](#), [Gradle](#), [Kotlin](#), [GIT](#)

May 2019

Elcreator

My father is a painter/artist. I developed a website to showcase his paintings, illustrations, and graphics. It was my first static [website](#), and it was a delightful experience.

[Gatsby JS](#), [JavaScript](#), [Contentful CMS](#), [Vercel](#), [CSS](#), [npm](#)

October 2018

Belga

I was responsible for developing the backend API of a new application called [Belga-press](#). This application provides users on the platform with access to a wide range of news articles. Users can create detailed search queries, and to handle the heavy lifting, the articles were duplicated in a Solr cluster where we could use Lucene's full-text search capabilities.

[Java EE](#), [Spring](#), [WildFly](#), [Elasticsearch](#), [Jenkins](#), [Solr](#), [Maven](#), [Active MQ](#), [Redis](#), [Oracle SQL](#), [openapi 3.0](#)

August 2018

Axxes traineeship

After completing my studies, I felt the need to continue learning, which led me to pursue a career as a consultant. Axxes provided the perfect environment for learning and growth. I participated in the [Axxes Traineeship](#), which equipped me with a strong technology foundation.

[Git](#), [Java](#), [Spring](#), [Angular](#), [React](#)

May 2018

Intracto digital agency

As an intern, I gained my initial experiences in the web development field at Intracto. During my internship, I focused on creating a Drupal website for the client [Liantis](#). This involved developing Drupal components and actively collaborating with the tech and analytics teams.

[PHP](#), [Drupal](#)
